Products

The start to a bomb appointment is a consultation

The Sylist and the Client
must be on the same page

There are **two consultations that must happen; online - during booking (more on this later) & before the start of the appointment.**

Consultation Questions

- **Do you have any questions about your appointment today?**
- **Have you had locs before and what was your experience?**
- **Are there any areas of your hair you are concerned about?**
- **Here is the plan for your appointment today (detail plans for their appointment)**

Next, Assess the hair

- **Check for any hair damage and politely point it out**
- **Check to ensure the hair is clean**

Let's talk about damaged hair

Handling Relaxed hair

- **If a client's hair has been relaxed within the last 4 weeks, it is not best practice to install locs or braids. This is covered in the online consultation (more on that later)**

IMPORTANT

- **4 packs of Crochet Hair**
- **3 Packs of wrapping hair**
- **To be safe I always purchase 5 packs of crochet hair and 4 packs of wrapping hair.**
- **When completing extended locs, you would double the amount (more on that later)**

Luxe Locs & Island Locs

- **Luxe Locs** - think Lisa Bonet Locs, shiny, flexible and super soft.
- **Island Locs**- very similar to luxe locs **without the sheen**. This is the smallest loc type and can pass as mini locs.

Luxe Locs

Island Locs

Boho & Gypsy Locs

- **Boho Locs - think Megan Goode locs, this loc type is the coarser loc type, with little to no sheen.**
- **Gypsy Locs- Boho locs with human hair ends and human hair flowing throughout.**

Boho

gypsy

Ombre & Color Mixing

- Store bought Ombre vs Manually creating ombre. **BONUS MANUALLY CREATING OMBRE IS THE MONEY MAKERRRRRRRRRRRR**
- Mixing Colors and creating highlights without **the tacky look of random pop up colors.**

Ombre

color mixing

BONUS

- **EXTENDING LOCS TO LONG LENGTHS**

TOUCH UPS

- **Touch ups can be performed on the perimeter or the entire head.**
- **Touch ups are usually done 2 months after the initial install.**
- **No more than 2 touch ups should be performed on an install.**

Performing Takedowns

- You have the option to perform take downs or you can **send clients an instructional video.**
